

B.I.G. Guard Booth Finalist in 3rd Annual 2011 Government Security Awards

October 20, 2011 Los Angeles: The 2011 B.I.G. Ultimate Ballistic & Blast Resistant Enclosure (BBRE) was honored as a Finalist in the Best Perimeter Protection Product category by the judges of the Government Security Awards. The other finalist chosen was Nasatka Barriers. The winner will be announced at the awards dinner on November 14 in Washington D.C.

Built to the highest level of ballistic and blast resistance available with custom locking slide type gun ports, B.I.G.'s Ultimate BBRE has a ductless split system HVAC with low ambient temperature feature. Windows and doors are manufactured and installed to allow the guard to respond even after a severe blast occurs near the installation location.

Working extensively with leading ballistics engineers and suppliers of ballistic resistant materials, B.I.G. employs highly specialized materials such as fiberglass composites and armor-plated steel on their custom steel booths to achieve the highest level of blast resistance in the industry.

For over 45 years, B.I.G. Enterprises, Inc. of South El Monte, CA has engineered and manufactured prefabricated booths for the security and parking industry. Their selection of preassembled buildings includes guardhouses, cashier booths, portable buildings, bus shelters and a variety of custom made kiosks.

Utilizing a proprietary "Critical Span" manufacturing technique that increases convenience and strength in prefabricated structures, the B.I.G. team has booths protecting our nation's capital, nuclear power plants, international airports, colleges, universities and corporate offices. The B.I.G. team thanks the judges of the 2011 Government Security Awards for this recognition of their engineering and manufacturing.
